Jak Chair
Technical Specifications

Tait.

UPDATED • 15.09.24

A nimble form and fine-lined profile combined with the stylish tilt of the backrest make the Jak Chair - a premium outdoor dining chair - a handsome companion to the Jil Table, along with any other table in the Tait stable.
Whether indoors or out, Jak's zinc-plated, mild-steel frame is suitable for all situations and settings.

- Triple coated mild steel frame
- UV stable powder coat colour or galvanised finish
- UV stable nylon glides

The Jak Chair is a cult classic. A timeless design transcendent of fads, Jak's wireframe structure delivers graceful form and a fine-lined profile. Designed by Justin Hutchinson for Tait, this cohesive collection incorporates dining and bar compositions, occasional tables and a variety of seating options.

Perfect for home, hospitality, work – inside and out – mix and match finishes from a wide range of durable, powder coat colours and top options.

The Jak seating ensemble has graceful form, fine-lined profiles and stylishly tilted backrests. Jil Tables are elegant outside and in and take shape in Dining Table, Bar Table, Coffee and Side Table formats that can pair with a range of tops.

The Jak & Jil Collection is manufactured with mild steel and the Jak seat pad, incorporating premium exterior-grade foam and upholstered in a selection of luxurious outdoor fabrics, softens the raw materiality of the collection, providing superior comfort.

The Jak & Jil Collection is revered by architects and designers alike for its ability to speak to a range of residential and commercial contexts along with the assurance of genuine local manufacture using sustainable methodologies, quality craftsmanship supported with a manufacturer guarantee and product longevity.

Spanning commercial to residential and hospitality to corporate applications, each piece in this comprehensive collection is designed for outdoor use, though is equally at home indoors.

All Tait pieces are made locally and come with a 5-year warranty.
Tait's original designs are protected under design registration and copyright.

How to care for your Jak Chair

Tait.

GENERAL CARE

At Tait, we make products for life. Our products are crafted from high-performance materials designed to withstand the elements across our diverse Australian climate zones. We make design decisions with both form and function in mind, combining timeless and cutting-edge designs with beautiful finishes in order to elevate your outdoor (or indoor) experience.

Our collections are handcrafted from weather-resistant materials, making each piece a durable choice. In order to maintain their look and feel over time, Tait items need ongoing care and maintenance. The frequency of maintenance will vary depending on the level of care you want to provide, your personal standards and requirements as well as the environment within which the product lives.

Please refer to the care instructions relevant to the specific materials and finishes of your product, and take note of the warranty details to understand the parameters.

We finish making our products by hand, and know they can live a long and useful life when equally cared for in your hands. For those rare occasions where it's needed, we offer a 5-year structural warranty (Australia only), made possible by the stringent quality control standards within our factory on Wurundjeri Land in Thomastown, Victoria.

The warranty does not cover:

- Damage from mishandling, mistreatment, abuse or lack of maintenance.
- Natural ageing, general wear and tear and fading.
- Damage from organic or man-made matter including mineral deposits, soils and fertilisers; or from the build-up of environmental mould.
- Corrosion spots at the weld joins (which do not affect the structural integrity of the product and are a natural outcome of the material used).
- Corrosion of steel furniture and parts as a result of hard seafront or chlorinated environments.
- Any variations in colour, shade or gloss levels of finishes including stone tops and timbers.
- Changes of heart based on personal preference.
- Transportation costs for replacement parts/products, or labour costs for repair (these are charged at our discretion)
  Goods that have been held in storage for any period (due to the potential impact of environmental extremities in certain storage facilities).

The above Tait warranty terms are accepted by the customer and end-user upon order and supply.

POWDER COAT

CARE & MAINTENANCE

Wash regularly with warm soapy water and mild detergent using a soft cloth. For commercial, industrial or marine environments we recommend monthly maintenance. Always rinse well with water, to remove any remaining detergent.

Avoid steam cleaning, pressure washing, abrasive cleansers, steel brushes/wools and cleaners containing chlorine. Avoid scratching the surface by dry dusting. Never use strong solvents to clean powder coated surfaces. Aggressive solvents such as turpentine, white spirits, thinners, citrus based cleaners, Spray and Wipe, and other aggressive solvents are harmful to the extended life of the powder coated surface. Do not allow detritus, organic or man-made matter to settle on the product surface. We recommend removing any buildup of mineral deposits leaching from soils and fertilisers, should it occur on Tait's planters.

Rough treatment of powder-coated furniture can result in chipping of the coated surface; this is not covered under warranty.

Most Tait products come with protective fittings – stacking glides, bumpers, socks/feet and glides. These aid in protection against chipping and scratching. Powder coated chairs are designed to be set in place gently.

Touch-up paint may be purchased on request. It is advisable to repair minor nicks and scratches as soon as they appear.

When placing a furniture cover over a table for an extended period of time, it is recommended to first place an empty plastic pot plant in the centre of the table, then placing the furniture cover over the top. This will prevent the possibility of the furniture cover adhering to the table surface.

Should you wish to touch up any blemishes which may occur, please contact your nearest Tait showroom and request a Powder Coat Touch Up Kit. Please follow our Powder Coat Touch Up Guide (available under 'Dimensions and Specs – Download Assets' on the product page) for application details.

WARRANTY

Powder coat is a decorative finish for indoor and outdoor use. While it assists with metal protection, it is not a corrosion protection in its own right. The components of Tait powder coated products are produced in either aluminium, stainless steel or mild steel.

The mild steel base materials are treated with two levels of pre-protection that guard against corrosion. The products are then powder coated to make the surface resistant to corrosion and suitable for use in exterior environments.

Minor corrosion spots at the weld joins – under table tops, bases and seat frames, may be evident on mild steel products. These do not affect the structural integrity of the product and are not

covered by the Tait warranty.

Whilst every care is taken to provide the most suitable finish according to the use and the environment the product will be subjected to, Tait cannot guarantee this decorative finish against scratching, scuffing, chipping, fading or corrosion as a result of use in harsh seafront, extreme or environments where chlorine is present.

Tait offer a range of powder coat colours which offer excellent UV stability and are suitable for use in outdoor applications. Whilst powder coat offers excellent colour retention, natural fading is not covered under the Tait warranty. To ensure longevity of this finish please refer to the care and maintenance.

The warranty does not cover any occurrence of detritus, organic or man-made matter settling on the product surface. The warranty also excludes buildup of mineral deposits leaching from soils and fertilisers, should it occur on the surface of Tait's planters. Nor does this warranty cover any product corrosion directly caused by aforementioned matter.

Tait assume no responsibility for product damage caused by the use of furniture covers.

GALVANISED STEEL

CARE & MAINTENANCE

Hot-dip galvanising a mild steel frame provides an extra layer of protection from corrosion. We offer a galvanised finish on some of our steel products specified for use in extreme environmental conditions, or for those seeking an industrial aesthetic.

For the technically inclined and detail-oriented, here are some fun facts about a galvanised steel finish:

-It has a protective zinc coating which gives a sacrificial layer that inhibits corrosion of the base metal
-Tait uses the hot-dip galvanizing method whereby each piece is submerged in a bath of molten hot zinc
-It is very low-maintenance
-It's the Real McCoy of industrial finishes and so surface irregularities, such as small bumps and surface coarseness will be apparent but is all part of the appeal
-It is bright silver when new and will gently dull over time. But don't we all...

We offer a hot-dip galvanised finish on the following collections:
-Jak & Jil, Flint Collection , Kink Collection, Stripe Stool

No specific maintenance is required; however, we recommend washing your galvanised products with water and a soft brush every six months to remove dirt and debris build-up.

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty.

WARRANTY

Galvanised steel is an industrial finish which offers superior corrosion protection. Surface irregularities, such as small bumps and surface coarseness may be apparent and are characteristic of the finish. Whilst care is taken to remove these irregularities where possible, they are a result of the galvanising process and are not covered under warranty.
