

# Jil Side Table

## Technical Specifications

**Tait.**

UPDATED · 13.10.21

A timeless design transcendent of fads the Jil Side Table - an elegant, premium outdoor side table - has a wireframe structure that delivers an elegant form and fine-lined profile. Perfect for home, hospitality, work - inside and out.

- Residential Orders: 8 weeks.
- Commercial Order (based on quantity): 10 - 12 weeks
- For orders outside Australia, please contact [international@madebytait.com.au](mailto:international@madebytait.com.au)

The Jil Side Table is a new design classic. A timeless profile transcendent of fads, Jak & Jil's wireframe structure delivers graceful form and a fine-lined silhouette. Designed by [Justin Hutchinson](#) for Tait, this cohesive collection incorporates dining and bar compositions, occasional tables and a variety of seating options.

Perfect for home, hospitality, work - inside and out - mix and match finishes from a wide range of durable, powder coat colours and top options.

The [Jak seating](#) ensemble has graceful form, fine-lined profiles and stylishly tilted backrests. Jil Tables are elegant outside and in and take shape in [Dining Table](#), [Bar Table](#), [Coffee](#) and Side Table formats that can pair with a range of tops.

The Jak & Jil Collection is manufactured with mild steel and the Jak seat pad, incorporating premium exterior-grade foam and upholstered in a selection of luxurious outdoor fabrics, softens the raw materiality of the collection, providing superior comfort.

The Jak & Jil Collection is revered by architects and designers alike for its ability to speak to a range of residential and commercial contexts along with the assurance of genuine local manufacture using sustainable methodologies, quality craftsmanship supported with a manufacturer guarantee and product longevity.

Spanning commercial to residential and hospitality to corporate applications, each piece in this comprehensive collection is designed for outdoor use, though is equally at home indoors.

All Tait pieces are made locally and come with a 5-year warranty.

Tait's original designs are protected under design registration and copyright.

# How to care for your Jil Side Table

## GENERAL CARE

The holy grail of outdoor furniture manufacturing is finding those mystical materials that neither weather nor fade under the extreme conditions of the great Australian outdoors. At Tait, we will not rest in our quest to find them, but in the meantime, we will keep on using the most premium materials we have at our disposal and tell you how to keep them at their best.

Here at Tait, our purpose is simple. To make beautiful outdoor furniture that's designed to last – at least – a lifetime. Our craft is combining high-performance materials, robust and durable enough to withstand the diverse Australian elements, with timeless, cutting-edge design in order to elevate the outdoor experience.

Put simply, Tait is where handmade, high-end design meets down-to-earth performance.

Like owning a luxury car, some TLC on your part will keep your Tait pieces ship shape, allowing them to weather and age gracefully over the seasons. The frequency of maintenance will vary depending on your personal standards and requirements as well as the environment in which the products live.

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty. Please refer to the materials and finishes relevant to your product as outlined.

## EXCLUSIONS

The warranty does not cover damage from mishandling, misuse, physical or chemical abuse, by not following proper care and maintenance instructions, accidental damage, damage from chipping, cracking, impact damage or breaking due to customer abuse.

- The warranty does not cover fading or natural ageing of the timber, non-structural defects in the timber, naturally occurring timber features, surface and end checking, or lack of maintenance leading to an acceleration of any of these issues.
- The warranty does not cover corrosion originating from scratches or abrasions that result from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- The warranty does not cover any occurrence of any detritus, organic or man-made matter settling on the product surface. The warranty excludes buildup of mineral deposits leaching from soils and fertilisers, should it occur on Tait's planters. Nor does this warranty cover any product corrosion directly caused by aforementioned matter.
- The warranty does not cover minor corrosion spots at the weld joints: under table tops, bases and seat frames. These do not affect the structural integrity of the product and are a natural outcome of the material used.
- The warranty does not cover the corrosion of steel furniture and parts, including stainless steel, as a result of direct use in harsh seafront locations or in a confined, chlorinated environment.
- The warranty does not apply to normal wear and tear or natural fading of the materials used.
- The warranty does not apply to any variances in colour, shade or gloss level of finishes, stone tops and timbers.
- The warranty does not cover products that the customer decides they do not like following delivery, including to colour, fabric, timber or other opinions based on personal preference.
- Tait shall not be liable for, and specifically excludes, any claims caused directly or indirectly by any event or matter beyond its control, including incidental, consequential or contingent damages suffered as a result of the use of the furniture or a breach of this warranty either written or implied.
- All products purchased at a sale price are subject to the specific warranty conditions outlined on sale invoice.
- The warranty does not cover transportation costs for replacement parts and products or labour costs for repair. These costs may be charged at our discretion.

Please note: Tait cannot provide product refurbishment requests or non-urgent warranties during the period of October 1st – January 30th.

The above Tait warranty terms are accepted by the customer and end-user upon order and supply.

---

## POWDER COAT

### CARE & MAINTENANCE

Wash regularly with warm soapy water and mild detergent using a soft cloth (in mild environments every 6 months). For commercial, industrial or marine environments we recommend monthly maintenance. Always rinse well with water, to remove any remaining detergent.

Avoid steam cleaning, pressure washing, abrasive cleansers, steel brushes/wools and cleaners containing chlorine. Avoid scratching the surface by dry dusting. Never use strong solvents to clean powder coated surfaces. Aggressive solvents such as turpentine, white spirits, thinners, citrus based cleaners, Spray and Wipe, and other aggressive solvents are harmful to the extended life of the powder coated surface. Dull surfaces can be revived using a cream cleanser or car polish. Do not allow detritus, organic or man-made matter to settle on the product surface. We recommend removing any buildup of mineral deposits leaching from soils and fertilisers, should it occur on Tait's planters.

Rough treatment of powder-coated furniture can result in chipping of the coated surface; this is not covered under warranty.

Most Tait products come with protective fittings – stacking glides, bumpers, socks/feet and glides. These aid protection against chipping and scratching. Powder coated stacking chairs are designed to be set in place gently.

Touch-up paint may be purchased on request. It is advisable to repair minor nicks and scratches as soon as they appear.

# How to care for your Jil Side Table

**Tait.**

## WARRANTY

Powder coat is a decorative finish for indoor and outdoor use. While it assists with metal protection, it is not a corrosion protection in its own right. The components of Tait powder coated products are produced in either aluminium, stainless steel or mild steel.

The mild steel base materials are treated with two levels of pre-protection that guard against corrosion. The products are then powder coated to make the surface resistant to corrosion and suitable for use in exterior environments.

Minor corrosion spots at the weld joints - under table tops, bases and seat frames, may be evident on mild steel products. These do not affect the structural integrity of the product and are not covered by the Tait warranty.

Whilst every care is taken to provide the most suitable finish according to the use and the environment the product will be subjected to, Tait cannot guarantee this decorative finish against scratching, scuffing, chipping, fading or corrosion as a result of use in harsh seafront/extreme environments.

Tait offer a range of powder coat colours which offer excellent UV stability and are suitable for use in outdoor applications. Whilst powder coat offers excellent colour retention, natural fading is not covered under the Tait warranty. To ensure longevity of this finish please refer to the care and maintenance.

The warranty does not cover any occurrence of detritus, organic or man-made matter settling on the product surface. The warranty also excludes buildup of mineral deposits leaching from soils and fertilisers, should it occur on the surface of Tait's planters. Nor does this warranty cover any product corrosion directly caused by aforementioned matter.

Please note: Tait cannot provide product refurbishment requests or non-urgent warranties during the period of October 1st - January 30th.

## COMPACT LAMINATE COLOUR

### CARE & MAINTENANCE

Tait use FunderMax exterior high-pressure laminates (HPL) which offer extremely effective durability in outdoor and high-use (commercial) applications. Exceptionally hard-wearing, these products are:

- scratch resistant (not scratch-proof)
- easy to clean-solvent resistant
- extremely weather resistant
- impact resistant
- offer optimal UV light fastness.

### COMPACT LAMINATE CONSTRUCTION

If you really want to hear nothing but the clatter of cutlery on crockery at your next dinner party, did you know that compact laminate is constructed with layers of paper, dipped in resin and cured? These layers are then sandwiched between the decorative laminated top and bottom sheets and compressed. A process called polymerisation melds them all together creating a solid-core panel that is an extra tough durable laminate.

### CARING FOR YOUR COMPACT LAMINATE

DO:

- Dust with a soft, dry (we prefer microfibre) cloth
- Wipe up spills using a damp (we still prefer microfibre) cloth
- For persistent stains use hot water and household detergent, then remove with clean water or window cleaning agent
- Repeat several times if necessary
- Rub surface dry with an absorbent clean cloth (we prefer paper towel) to prevent streaks or smears

DO NOT:

- Use steel wool, metallic scrapers or strong solvents to clean

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty.

## WARRANTY

FunderMax high-pressure laminates are extremely effective and particularly suitable for outdoor applications. The product has been chosen for its high weather resistance, optimal light-fastness and scratch resistance.

The laminate is not scratch-proof, with small nicks and scratches deemed general wear and tear. This is not covered by Tait warranty.

Please refer to the compact laminate section of the care and maintenance instructions.

All compact laminates are bound by the warranty of the manufacturer. Tait provides no warranty direct or indirect, implied or referred.

Please note: Tait cannot provide product refurbishment requests or non-urgent warranties during the period of October 1st - January 30th.

---

## GALVANISED STEEL

### CARE & MAINTENANCE

Like Superman's suit, hot-dip galvanising a mild (mannered) steel frame not only looks the business, it provides an extra layer of protection from corrosion. We offer a galvanised finish on some of our steel products specified for use in extreme environmental conditions, or for those seeking an industrial vibe.

For the technically inclined and detail-oriented, here are some fun facts about a galvanised steel finish:

- It has a protective zinc coating which gives a sacrificial layer that inhibits corrosion of the base metal
- Tait uses the hot-dip galvanizing method whereby each piece is submerged in a bath of molten hot zinc
- It is very low-maintenance
- It's the Real McCoy of industrial finishes and so surface irregularities, such as small bumps and surface coarseness will be apparent but is all part of the appeal
- It is bright silver when new and will gently dull over time. But don't we all..

We offer a hot-dip galvanised finish on the following collections:

-Jak & Jil, Flint Collection , Kink Collection, Stripe Stool

No specific maintenance is required; however, we recommend washing your galvanised products with water and a soft brush every six months to remove dirt and debris build-up.

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty.

### WARRANTY

Galvanised steel is an industrial finish which offers superior corrosion protection. Surface irregularities, such as small bumps and surface coarseness may be apparent and are characteristic of the finish. Whilst care is taken to remove these irregularities where possible, they are a result of the galvanising process and are not covered under warranty.

Please note: Tait cannot provide product refurbishment requests or non-urgent warranties during the period of October 1st - January 30th.

---

## GLASS

### CARE & MAINTENANCE

Please Note: Tait's glass option was discontinued from all Tait products on 1.6.2020. Please see recommendations below should you own an existing Tait product with glass table top.

Although our laminated glass [AS4669] is much more durable than normal glass, it is not unbreakable and should be treated with the same care as normal glass.

DO:

- Remove spills and stains with warm water, mild soap solution and a soft non-abrasive cloth
- Polish using either plain water and a micro-fibre cloth or a commercial glass cleaner

DO NOT:

- Sit or stand on the glass (yes, it needs to be said)
- Drop objects onto the glass
- Drag sharp or coarse objects across the glass top
- Drag your glass-topped table

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty.

# How to care for your Jil Side Table

**Tait.**

## WARRANTY

Tait glass-topped tables use laminated glass, suitable for furniture applications as per the Australian Standard 4669. Glass is not guaranteed against scratching and chipping and this is not covered by the Tait warranty.

Tait provides no warranty direct or indirect, implied or referred.

Please note: Tait cannot provide product refurbishment requests or non-urgent warranties during the period of October 1st - January 30th.
