

Rockpool Two Seater Curved Sofa

Technical Specifications

Tait.

UPDATED • 24.07.25

Rockpool brings together elegance and durability, with a smaller-footprint approach, and suitability for Senior Living environments. Organic flowing shapes are visually soft and nestle into their environment – yet are crafted to withstand challenging outdoor conditions. ‘There is a softness to the forms of naturally weathered rock pools,’ says industrial designer Adam Goodrum. ‘The way water carves smooth, undulating shapes into stone feels welcoming and timeless.’

- Powdercoated Aluminium frame
- UV stable powder coat
- Optional Spotted Gum armrest
- Available in two seat heights 400mm and 480mm
- Optional Rope detailing available in five colours
- Optional outdoor furniture covers
- Nylon glides

The collection was conceived to meet the growing need for particular environments. ‘The brief was to create a smaller-footprint product to Trace,’ shares Founding Director Gordon Tait. With the growth of more compact, medium and high-density living, the team set out to design something that could be used on smaller balconies, courtyards and verandahs, as well as cosy interior nooks.

The resulting collection celebrates and contributes to the small-footprint movement. The 3-Seater Sofa is almost 25% smaller than the Trace Sofa, a comparable upholstered collection. And the compact Rockpool Armchair is roughly 35% smaller than it’s Trace Armchair counterpart.

The Rockpool Armchair and Sofas are all available in both low (400mm) and raised (480mm) seat heights, with the latter delivering a refined solution suitable for Senior Living environments. The seat height is adjusted for easier entry and exit, whilst optional timber armrests are shaped for comfort and grip – providing a warmer and wider surface for lowering and raising into the armchair, as well as for arm resting. Seat cushioning offers both comfort and firmness, striking a balance between softness and the practical needs of older users.

Mokum’s ‘Pahi’ plain-woven fabric in an earthy colour palette complements the curved form. Its slightly uneven weave with subtle highlights provides a jewel-like richness and depth. Pahi’s extensive colour range is presented in a two-tone upholstery design with a beautiful stitched seam detail adding a subtle layering effect.

Like all Tait collections, Rockpool is designed for easy refurbishment.

How to care for your Rockpool Two Seater Curved Sofa

Tait.

GENERAL CARE

At Tait, we make products for life. Our products are crafted from high-performance materials designed to withstand the elements across our diverse Australian climate zones. We make design decisions with both form and function in mind, combining timeless and cutting-edge designs with beautiful finishes in order to elevate your outdoor (or indoor) experience.

Our collections are handcrafted from weather-resistant materials, making each piece a durable choice. In order to maintain their look and feel over time, Tait items need ongoing care and maintenance. The frequency of maintenance will vary depending on the level of care you want to provide, your personal standards and requirements as well as the environment within which the product lives.

Please refer to the care instructions relevant to the specific materials and finishes of your product, and take note of the warranty details to understand the parameters.

We finish making our products by hand, and know they can live a long and useful life when equally cared for in your hands. For those rare occasions where it's needed, we offer a 5-year structural warranty (Australia only), made possible by the stringent quality control standards within our factory on Wurundjeri Land in Thomastown, Victoria.

The warranty does not cover:

- Damage from mishandling, mistreatment, abuse or lack of maintenance.
- Natural ageing, general wear and tear and fading.
- Damage from organic or man-made matter including mineral deposits, soils and fertilisers; or from the build-up of environmental mould.
- Corrosion spots at the weld joints (which do not affect the structural integrity of the product and are a natural outcome of the material used).
- Corrosion of steel furniture and parts as a result of hard seafront or chlorinated environments.
- Any variations in colour, shade or gloss levels of finishes including stone tops and timbers.
- Changes of heart based on personal preference.
- Transportation costs for replacement parts/products, or labour costs for repair (these are charged at our discretion)
Goods that have been held in storage for any period (due to the potential impact of environmental extremities in certain storage facilities).

The above Tait warranty terms are accepted by the customer and end-user upon order and supply.

FABRIC

CARE & MAINTENANCE

As a leading manufacturer of outdoor design built to withstand harsh elements, we take pride in helping you get the most out of your Tait pieces. Much like owning a luxury tailored suit or dress, we recommend some key measures to ensure your fabric upholstery maintains its high performance and good looks for many years to come.

Tait recommends a select range of premium, high-performance, exterior-grade upholstery options, these fit-for-purpose fabrics have been hand-picked from a number of trusted textile suppliers worldwide. Constructed with the highest quality man-made yarns suited to outdoor extremities, these fabrics are advantageous for their inherent stain resistance, colour-fast resilience and durable qualities. In addition, many of these fabrics feature advanced technologies in their construction including solution-dyed olefin and acrylic, as well as Trevira CS flame retardance. Tait's range of selected fabrics has been used extensively and has performed exceptionally across numerous commercial and residential projects worldwide. Due to their ability to perform and cope under demanding pressures this selection of fabrics from Tait's tried and trusted range.

While individual fabrics will each have their own set of care and maintenance requirements as outlined by the supplier, the following provides general information to assist you in the best care for your upholstered items.

RECOMMENDATIONS

- Where upholstery products are continually exposed to the elements (uncovered location), it's highly recommended to keep upholstered seating protected where possible or to store any seat cushions when not in use. This will lengthen the life of your upholstery.
- When not in use, we recommend storing upholstery in sheltered places and/or covering it with waterproof protection. In this case, it is advisable to remove the cover and ventilate the product regularly to avoid the onset of any stains due to damp.
- When constantly exposed to the elements (including pollutants such as dirt, abrasants etc) outdoor fabrics will begin to degrade without care and maintenance. Just as timber and metal materials are affected by weathering, as too are fabrics.
- As with indoor materials, it is also essential that fabrics are vacuumed and cleaned regularly. Detritus; including food, bird or bat excrement, seeds, fruits, flowers from overhanging vegetation, can all have lasting impact on fabrics. We recommend removing these from the fabric surfaces as soon as possible to ensure the fabric looks its best for as long as possible.
- Organic matter specifically contains natural chemicals and acids, these will not only affect textiles, but also other materials including timber, paint and concrete.
- To prolong the life of the product, clean surfaces regularly and dry them with a clean cloth.
- Remove any stagnant water, especially if exposed to locations with a high level of humidity or a marine climate.
- It is always recommended to scrape any stains or spills off the surface of the fabric and carefully spot clean with soapy water. Make sure it is rinsed well with clean water afterwards to remove any remaining soap.

How to care for your Rockpool Two Seater Curved Sofa

Tait.

- Many outdoor fibres are so resilient that we even recommend cleaning with diluted bleach solution for very stubborn stains and marks. Please always check the care details with the fabric supplier prior to using a bleach solution on the fabric.

DO NOT

- Remove covers or machine-wash any upholstered items, as this may result in fabric shrinkage and foam distortion.
- Store away or cover upholstered items that are damp or wet, as this may result in mould or mildew forming. Ensure upholstery is completely dry before storing or covering.
- Dry clean or steam clean outdoor fabrics.

ROPE DETAIL

This is a high-strength, UV-stable polyester rope. To clean it, use a damp cloth with a solution of warm water and mild soap, then rinse with another damp cloth with water only. Allow to air dry. If the stain is deep or dirt persists, re-wet the rope with soap and water and rub with a soft plastic bristle brush. Rinse and let dry.

WARRANTY

- Fabrics, even if intended for outdoor use, may still be attacked over time by atmospheric pollutants. Any changes in the surface and in colours may therefore occur under particular conditions of exposure to said pollutants and cannot be considered grounds for a warranty claim.
- Outdoor fabrics are lined unglued, therefore any creasing in the upholstery is an inevitable consequence of use and cannot be considered grounds for a warranty claim.
- All fabrics used by Tait are bound by the fabric supplier's own warranty. Please refer to individual fabric suppliers for detailed information on care and maintenance.
- The warranty is extended to the invoiced purchaser only. Any claims must be by the invoiced purchaser.
- Tait provides no warranty direct or indirect, implied or referred.
- The application of third party fabric treatments will void upholstery warranty.
- Tait offers a 1-year warranty on upholstery components, this includes foam and finishing (stitches, zips etc).
- Optional furniture covers purchased are not included in Tait's warranty and are bound by the individual furniture cover supplier.

THIS WARRANTY WILL NOT COVER DEFECTS OR IMPERFECTIONS RESULTING FROM THE PASSAGE OF TIME OR DUE TO WEAR AND TEAR INCURRED BY NORMAL USE OF THE PRODUCT.

SPOTTED GUM

CARE & MAINTENANCE

Tait uses Spotted Gum species *Corymbia (eucalyptus) Malacuta* – a sustainable timber native to Australia – and all products finished with Spotted Gum have been pre-oiled using Tait's Exterior Oil finish. An oiled table will absorb liquids less quickly, keeping it clean for longer. The hotter the climate and the greater the exposure to the sun, the more frequently your timber will need to be oiled. We recommend a quarterly application in a harsh climate or commercial environment if you wish to maintain the original timber colour.

To retain your furniture's ex-factory finish and to comply with warranty requirements, please ensure you can provide evidence that care and maintenance has been performed.

Clean regularly and immediately after use with a damp cloth to prevent fluids from penetrating deep into the timber. Remove stubborn remains of dirt in the timber by using a stiff brush and some water.

DO NOT:

- Use a high-pressure cleaner as you will permanently damage the wood fibres.
- Use steel wool, wire brushes or any other abrasive for everyday cleaning.

Surface clean the timber elements of your outdoor furniture pieces at least twice a year. Wash the surfaces thoroughly with clean water to remove dust, grime and insects. A build-up of dust and grime can lead to the increased growth of green algae and other surface fouling.

Recoating your timber

To restore the original appearance of timber please contact Tait's customer service (customerservice@madebytait.com.au) to request a maintenance kit and follow the Exterior Oil Reapplication Guide (under "Dimension Specs - Download Assets" on the website product page of your Tait product).

TANNIN

Tannin is a naturally occurring substance in timber and will leach the first few times it is exposed to water. It will stain timber decking and paved areas that are light in colour. Objects left on the timber surface will also draw tannin out, creating surface marks. Removal of tannin stains will require the use of a soap solution or a deck/paving cleaner. Tannin stains will also fade when exposed to UV light. Tannin staining is not covered by the Tait warranty.

When placing a furniture cover over a table for an extended period of time, it is recommended to first place an empty plastic pot plant in the centre of the table, then place the furniture cover over the top. This will prevent the possibility of the furniture cover adhering to the table surface.

How to care for your Rockpool Two Seater Curved Sofa

Careless handling, treatment or misuse of our products can result in damage and is not covered under our manufacturer's warranty.

WARRANTY

Tait use Spotted Gum species *Corymbia (Eucalyptus) Maculata* a sustainable timber native to Australia. We select our timber carefully to address cracks, warping and splinters. Timber is a natural product and may be prone to unforeseen changes, particularly when exposed to extremes in temperature and humidity. The timber is covered for 1 year from the date of purchase, subject to proper maintenance by the purchaser and fair wear and tear. The above warranty extends to the timber for serious faults (such as severe twisting or severe splitting).

End checking may appear and is not claimable under warranty. Tannin may leach from the timber and may stain timber decking and paved surfaces that are light in colour. This is not covered by the Tait warranty. Please refer to the timber section of the care and maintenance instructions for further information on tannin. Any changes in the visual appearance of timber that are directly linked to ageing are not covered by warranty. As timber is a living material, the appearance of its surface evolves naturally over time.

Tait assumes no responsibility for product damage caused by the use of furniture covers.
